

# SECMAN - NEWSLETTER

**No. 01 / 2012**

Dear Sir or Madam,

The SecMan consortium would like to inform you about the project and the first SecMan Workshop.

## THE PROJECT

The EU-project SecMan (“Security Risk Management Processes for Road Infrastructures“) aims to develop a practical process for the identification of critical infrastructures in Europe. Furthermore, the assessment of these infrastructures in a structured and comparable way as well as the determination of effective protection and mitigation measures is an integral part of SecMan. These methodologies will be summarized and combined into a comprehensive best-practice manual which allows for a trans-national structured and holistic security-risk-management approach for owners and operators of road infrastructures in Europe.

SecMan is implemented by the German Federal Highway Research Institute (BAST) together with project partners from Austria (ILF) and Slovenia (DARS, ELEA iC). The project incorporates results of previous national and international research projects (SeRoN, SKRIBT, RETISS, etc.).

## 1<sup>ST</sup> SECMAN WORKSHOP

The date and venue for the first SecMan-Workshop has now been selected: The workshop will be held on the 13<sup>th</sup> June 2012 at the Federal Highway Research Institute (BAST) in Bergisch Gladbach, Germany.

The workshop is specifically aimed at experts who are interested in security issues regarding transport networks. Several speakers will present recent results of the project and participants will have the opportunity for discussion in an informal atmosphere.

For more information please visit our project website under <http://www.secman-project.eu>.

If you like to unsubscribe to the SecMan Newsletter, please write to [secman@bast.de](mailto:secman@bast.de) indicating your name, institution and email address.

With kind regards  
The SecMan Consortium
